

Job Title: Mechanic

POSITION OBJECTIVE

Mechanic will be tasked PM and corrective maintenance on diesel engines, booms, electrical systems (including troubleshooting onboard computer systems), hydraulic systems (booms, outriggers, pumps), brakes and other basic components. The mechanic will be working on hydraulic drills, hydraulic and conventional cranes, forklifts, tractor trailers and miscellaneous equipment. The mechanic must work well and communicate effectively with operators and other mechanics.

Qualifications

- Minimum of 3-years-experience in crane or drill maintenance
- Mechanical aptitude
- Experience in crane and drilling operations
- Must work safely in a fast-paced environment – many times under pressure
- Experience in diesel, gasoline and propane engines
- Proven ability to read electrical and hydraulic schematics
- Experience troubleshooting and repairing electrical boards and crane computer systems
- Pass drug test, fit for duty and clean background check

Skills, Knowledge, and Abilities:

Knowledge of:

- Good communication and team work skills.
- Safe ethical work practices
- Good mechanical background.

Required Traits 5 or More

- Internal combustion engines to include Diesel, gas and propane engines theory repair and operation.
- Cooling systems.
- Tool identification.
- Fastener identification.
- All areas of hydraulics to include; component id, fittings, hoses, pressures, system characteristics.
- All areas of electrical to include; 120 to 480-volt AC, and or 12-24 Volt Dc electrical systems component id relays, gen-sets, wire id, theory and application.
- Heavy truck repair.
- Heavy trailer repair.
- Hydraulic systems.
- Electrical systems.
- Drivetrain knowledge and repair.
- Multiple axle steering, theory and operation.
- Suspension theory and operation.
- Braking systems; hydraulic, and air. Wet and dry.
- Oil identification and proper use of lubricants.
- Pneumatic systems and troubleshooting.
- Plumbing and pipe fitting.
- Charging and starting systems.
- Machining and tooling.

Beneficial Areas of Knowledge:

- Material identification and property characteristics of raw materials used in fabrication.
- Welding and fabrication theory and application.
- Parts ordering and sourcing.
- Microsoft Computer programs.
- Schematics comprehension, electrical and hydraulic. Read comprehend and execute purchasing and advise techs on any needed knowledge.
- Forklift knowledge and experience.
- Crane theory and operation.
- Drill theory and operation.
- Valid Class A CDL.
- Rigging and overhead lifting.
- Sourcing foreign parts.

Physical Demands, Hazards, and Working Conditions: The employee will have to meet these requirements, with or without reasonable accommodation, to succeed in this position.

The position requires very heavy work involving exerting over 75 pounds of force on a regular basis. While performing the duties of this job, the position is exposed to outside work conditions which could mean extreme heat and/or cold, wet/humid conditions, bright and/or dim light, dust or pollen. While performing the job duties the employee may also be exposed to intense noise levels, vibration, fumes or noxious odors, moving mechanical parts, working around heavy equipment, and heights.

The position requires normal visual acuity and field vision, hearing and depth perception.

Inland is located in the beautiful city of Boise. Relocate for a wonderful quality of life in Idaho! We are an equal opportunity employer. We offer health and retirement programs. Very competitive compensation packages. We are an EEOC. Pay is DOE.

Position available immediately.
