- Operating large diameter hydraulic drills
- Inspecting and maintaining equipment to manufactures specifications
- Experience in operating heavy-duty equipment: excavators, forklifts, mini-excavators, and trucks
- Direct daily onsite crew assigned to the project
- Troubleshoot mechanical issues quickly and efficiently, analytical ability to find solutions to difficult technical problems
- Responsible to maintain safe working environment and follow IFS and OSHA standards
- Coordinate with Project Managers on project needs
- Works harmoniously with peers, supervisors, and the public and complies with IFS's policies
- Operating experience with short mast or low drills, and cranes is preferred, but not required.

Skills, Knowledge, and Abilities

- Operating heavy equipment
- Proper use and understanding of crane rigging and signaling
- Through understanding of drill tools and equipment
- Self-motivated and willing to challenge themselves

License(s) or Certification(s) Required

- Valid Driver's License, with the ability to obtain a Class A CDL
- Medical Card
- Certifications: Forklift, Manlift, Truck, Rigging, signal person, 10-hour OSHA, etc. or the ability to obtain them. In- house training and certification may be available.
- NCCCO Crane certification is preferred but not required; in house training and certification may be available.
- Welding Experience and preferably Certifications.
